1. Quick Start Power Button
2. SOS/Flashlight Power Switch
3. USB Out/In
4. Fuel Gauge (Battery Status Indicator)

Included items:
- 1 *HALO Pocket Power StarLight 3000*
- 1 split cable (standard USB split on one end and standard USB and micro USB on the other ends)
- 1 AC wall charger
- 1 30-pin connector tip
- 1 carrying pouch
- Operating Instructions/Warranty
Getting Started

Charge the *HALO Pocket Power StarLight 3000* until the LED displays a solid green light (no lights should be flashing). This will take up to six hours and will fluctuate depending on the charging power source.

IMPORTANT: Charge your HALO charger for a full six hours before regular use. Subsequent charging will take five - six hours.

Charging the *HALO Pocket Power StarLight 3000*

Using the supplied *HALO Charge It Charge Me* cable, plug one USB connector into the HALO charger and plug the other USB connector into a computer or an AC power source with a USB 5V input.

While charging the HALO charger, the LED will flash one of the following colors, indicating the charge level. Red (1%-33%), orange (34%-66%), and green (67%-99%). When the HALO charger is 100% fully charged the green LED will become illuminated and no longer flash. When the charger is not in use, slide the power switch to the OFF (lower) position to conserve the battery.

The charging cable works in either direction (see Figure 1 for reference). Connect A to the power source
and B to the HALO charger, or connect B to the power source and A to the HALO charger.

**Charging Your Personal Electronic Device**
Using the supplied split cable, plug one USB connector into the HALO charger and insert the provided appropriate tip into your device. The HALO charger will automatically begin charging. You may also use your own USB cable that was supplied with your personal electronic device. While charging your device the LED color (red, orange or green) on the fuel gauge of the HALO charger will change over time, indicating the remaining capacity of the HALO charger's battery. The red LED will start flashing when the HALO charger is out of power before shutting down.

Using the supplied split cable, you can charge both the HALO charger and your electronic device at the same time. To do this you must first plug either the USB connector into a computer (or another 5V input USB charging source), and then connect the HALO charger and your electronic device.

After removing your device from the supplied 30-pin connector tip, the HALO charger will remain on for 30 seconds before powering off. If you wish to charge
your device again after the HALO charger has timed off you must manually power on the HALO charger. You can do this by holding down the button underneath the fuel gauge for three seconds.

**SOS and Flashlight Operation**
To enter into SOS mode slide the power switch forward once into the middle position (labeled “SOS” on the HALO charger). To enter into flashlight mode slide the power switch forward into the “ON” position.

The HALO charger will charge your personal electronic device in all three modes (OFF, SOS and ON mode). When charging your personal electronic devices it is recommended to leave the HALO charger in the “OFF” position.

**To Turn On/Off the HALO Pocket Power StarLight 3000**
The HALO charger will automatically turn on and begin charging as soon as it is plugged into your personal electronic device. To preserve the battery, the HALO charger will automatically turn off if the electronic device is fully charged and no longer drawing power. When the HALO charger is manually unplugged from your device it will automatically turn off after 30 seconds. The unit may also be turned
on/off by manually pressing the power button down for three seconds.

**Power Indicator/Battery Status**
When charging/discharging, the LED will flash one of the following colors indicating the amount of battery level remaining: red (1%–33%), orange (34%–66%) or green (67%–99%). The power status can also be checked by pressing and releasing the power button when the unit is not in use. When the HALO charger is 100% charged, the green LED will stop blinking and turn solid green.

**Storing/Handling/Cleaning the HALO Pocket Power StarLight 3000**
- Do not get wet or store in extreme temperature conditions.
- Do not disassemble the HALO charger or attempt to repair it.
- Use a soft cloth with soap to clean the exterior of your HALO charger. Do not use liquid detergent or chemicals of any kind.
**Safety Precautions**

- This HALO charger has been designed and manufactured to ensure personal safety. Please read the following carefully before using. Incorrect operation or incompatibility with your personal electronic device may result in reduced battery performance or damage.

- Carefully read the operating instructions, and use the HALO charger correctly.

- Caution: The lithium-ion rechargeable battery used in this charging device may present a risk of fire or chemical burn if mistreated. Do not disassemble, expose to heat above 212°F (100°C) or incinerate.

- Misusing or incorrectly connecting the HALO charger may cause electric shock to users and damage equipment. The HALO charger may become warm under extended high power operation. During operation, keep the HALO charger away from materials that may be affected by these temperatures.

- When used correctly, lithium-ion rechargeable batteries provide a safe and dependable source of portable power. However, if they are misused or abused, this may result in leakage, burns, fire or explosion, causing personal injury or damage to other devices.

- Do not disassemble the HALO charger. There are no user-serviceable parts inside. Incorrect reassembly
Safety Precautions

- This HALO charger has been designed and manufactured to ensure personal safety. Please read the following carefully before using. Incorrect operation or incompatibility with your personal electronic device may result in reduced battery performance or damage.
- Carefully read the operating instructions, and use the HALO charger correctly.
- Caution: The lithium-ion rechargeable battery used in this charging device may present a risk of fire or chemical burn if mistreated. Do not disassemble, expose to heat above 212°F (100°C) or incinerate.
- Misusing or incorrectly connecting the HALO charger may cause electric shock to users and damage equipment. The HALO charger may become warm under extended high power operation. During operation, keep the HALO charger away from materials that may be affected by these temperatures.
- When used correctly, lithium-ion rechargeable batteries provide a safe and dependable source of portable power. However, if they are misused or abused, this may result in leakage, burns, fire or explosion, causing personal injury or damage to other devices.
- Do not disassemble the HALO charger. There are no user-serviceable parts inside. Incorrect reassembly may result in shock or fire hazard.
- Do not drop or subject to strong impacts. Do not operate the HALO charger if it has received a sharp blow, or otherwise been damaged in any way.
- Do not expose the HALO charger to moisture, water, rain, or snow.
- Do not insert any object into the ports or openings of the HALO charger.
- Never charge the HALO charger unattended.
- There is a risk of the batteries exploding, overheating, or igniting. Do not disassemble, modify, heat or short-circuit the batteries. Do not place in fire or leave in hot places. Do not expose to direct sunlight.
- Only charge the HALO charger by the specified method with the specified USB cable.
- In the unlikely event of leakage or explosion use sand or a chemical fire extinguisher.
- Batteries should be recycled or disposed of as per state and local guidelines.

Specifications

Battery: Rechargeable Lithium Polymer
Power Capacity: 3000mAh
Output Volt: DC 5V
Rated AC Input: 110V~240V
Rated DC Input: 12V~24V
Output Voltage (DC): 1000mA
FCC Compliance Statement
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

15.21
You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

15.105(b)
This equipment has been tested and found to comply with the limits for Class B digital devices, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the
interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Limited Warranty**
HALO2CLOUD, LLC warrants its products to be free from defects in material and workmanship under normal use. Conditions are as follows:
- During the first one year from date of purchase, HALO2CLOUD, LLC will repair or replace the defective product.
- HALO2CLOUD, LLC will, subject to inspection, repair the defective product or replace it with a new or reconditioned unit. The return must be accompanied by a Return Materials Authorization (RMA) number to be issued upon request, and must be shipped prepaid. A shipping rebate will only be extended to the customer in the event that a defect in material or workmanship is confirmed.
- Warranty is void if the product has been improperly handled or misused in any way, or if the label and/or
bar-coded warranty label has been removed or tampered with.
- Warranty returns require a check for $14.95 for processing and handling made payable to HALO2CLOUD, LLC.
- Where applicable, all requests for warranty returns must be accompanied by a proof of purchase and be sent to HALO2CLOUD, LLC (www.halo2cloud.com).
- The warranty does not extend to the electronic equipment that is used or which incorporates with any of our products and accessories. HALO2CLOUD, LLC shall not be held responsible for the improper use of its products.
